

INTERNSHIP REPORT
ON
WEBSITE DESIGNING AND FRONT-END DEVELOPMENT

Submitted
To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree
B.Tech (Computer Science and Engineering)

By

YASHICA SACHDEVA
Roll Number: 2410030620
Batch: 2024–2028

CANDIDATE'S DECLARATION

I, Yashica Sachdeva, hereby declare that the internship report titled “Website Designing and Front-End Development” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree/diploma requirement, and further I shall be solely responsible for any kind of copyright violation in this regard.

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to everyone who supported me throughout my internship program at Le Webexy Private Limited. I am thankful to the organization for providing me with the opportunity to gain practical exposure to website designing, UI/UX fundamentals and front-end development practices. The internship helped me understand how design work is carried out in a professional environment and how creative decisions are translated into usable digital interfaces.

I am grateful to the company team and the Director for their guidance, feedback and support during the internship. I am also thankful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering for their continuous support and encouragement.

To

Ms. Yashica Sachdeva

Web Designing Intern

Department: Web Development

Subject: Internship Letter

This is to certify that Ms. Yashica Sachdeva has successfully completed a 3-month internship in Website Designing at Le Webexy Pvt. Ltd.

During the period of her internship, she demonstrated a strong understanding of web design principles, UI/UX fundamentals, and front-end development practices. She actively contributed to multiple live projects, showing creativity, responsibility, and a keen interest in learning modern web technologies.

Her performance was satisfactory, and she exhibited excellent teamwork, problem-solving, and design execution skills throughout the internship.

We wish her all the best for her future endeavors and a successful career ahead.

Duration: 1st Jun 2025 to 31st Aug 2025

Company: Le Webexy Pvt. Ltd.

Designation: Website Designing Intern

For Le Webexy Private Limited

Le Webexy Private Limited

Director

Divyanshu
Director

4. PROJECT DESCRIPTION

4.1 Introduction

The internship at Le Webexy Private Limited provided practical exposure to website designing within a professional web-development environment. The role focused on applying web-design principles, UI/UX fundamentals and front-end development practices to live client-oriented work. The internship bridged academic understanding with professional workflows such as receiving requirements, creating visual solutions, reviewing work, making revisions and delivering designs within deadlines.

4.2 Organization Profile

Le Webexy Private Limited is the organization where the internship was completed. The supplied internship document identifies the registered office as C-3/7, 2nd Floor, Prashant Vihar, Sector 14, Rohini, Delhi 110085. The organization provided the internship in the Web Development department, with the designation Website Designing Intern.

4.3 Problem Statement

A website must communicate information clearly while remaining visually consistent, usable and responsive across devices. During the internship, the practical challenge was to translate project requirements into clear interface designs and front-end-oriented solutions while working within professional deadlines. The work therefore involved balancing visual design, usability, consistency and implementation feasibility.

4.4 Project Objectives

- Understand professional website-design workflows.
- Apply UI/UX principles to practical interface requirements.
- Gain exposure to front-end development practices.
- Create responsive and visually consistent design solutions.
- Improve teamwork, problem-solving and design execution skills.
- Learn to manage deliverables according to professional deadlines.

4.5 Scope of the Project

The internship scope covered website designing and related front-end design activities. The supplied company letter confirms contribution to multiple live projects. Since the source documents do not provide the names, URLs or confidential specifications of those projects, this report intentionally does not invent project-specific client details. The scope described here is therefore limited to the

documented areas of web design, UI/UX, front-end practices, design execution, teamwork and problem solving.

4.6 Technologies and Tools Used

The supplied internship documentation specifically supports the use of web-design principles, UI/UX fundamentals and front-end development practices. The resume also lists HTML and CSS at a basic level, along with Canva and Figma (Basic), as part of the student's broader skills. These tools/skills are included as supporting context rather than as claims about a particular confidential client project.

4.7 System Architecture

For a typical website-design workflow, the work can be represented as a simple flow:

Requirements → Content/Information Structure → UI Layout → Visual Design → Front-End Implementation → Review & Feedback → Revision → Delivery.

This workflow is presented as a process model for the internship activities and is not a claim about a proprietary architecture of any one client project.

4.8 Methodology

The internship work followed an iterative design-and-review approach. First, the required information and design objectives were understood. Next, interface layouts and visual decisions were developed using UI/UX principles. The work was then reviewed, refined and prepared for delivery. Throughout the process, teamwork, problem solving and deadline management were important. Iteration helped improve clarity, consistency and design execution.

Note: There was no stipend associated with this internship.

4.9 Expected Outcomes

The expected outcomes of the internship were practical understanding of professional website design, improved UI/UX awareness, exposure to front-end development practices, stronger design execution, better teamwork and problem-solving abilities, and greater confidence in delivering work under deadlines. The company letter confirms satisfactory performance and specifically notes teamwork, problem-solving and design execution skills.

4.10 Certificates of Completion and Communication Proof

The original Le Webexy internship document is included in the submission package as the completion proof. It records the internship duration, designation, department, organization and a summary of the work and performance.
